TO THOSE WHO APPRECIATE HUNTINGTON'S VALUES

August, 1933

THIS past Spring revealed to us that our policy of a high grade of plants and seeds sold at a fair and reasonable price was the policy that attracts the experienced buyer who knows true values.

With a wide-spread misrepresentation of values by those not legitimately in the Nursery Trade the retail buyer has become slightly confused on the true worth of selected plants.

Plants grown from selected seeds; plants grown by specialists who know the individual requirements of each plant; plants grown with a strong, sound root system that will make an immediate effect in your garden; these are the plants that you want for your border and rockery.

Our plants fulfill all of the above requirements.

We strongly recommend Fall planting, and the month of September is ideal. Plants transplanted in September and early October have plenty of time to acclimate themselves before winter, especially if they are plants with large root systems.

To stimulate early planting we are offering a ten percent discount on all orders over five dollars when ordered before September fifteenth.

We are stressing quality, selling quality, and when you see your results next Spring with our plants we are confident we will further merit your kind consideration on quality alone.

RALPH E. HUNTINGTON NURSERY

Painesville, Ohio

Alpine and Perennial Novelties

C O N T I N U E D

HEMEROCALLIS "MRS. A. H. AUSTIN"—Extra large flowers of deep golden orange that bloom well into July. One of Betscher's fine hybrids. Each 75c, per three \$2.00.

IRIS PUMILA "ORANGE QUEEN"—A charming dwarf orange yellow. A bright spot in the early Spring. Each 20c, per 10 \$1.20.

PHLOX SUBULATA "ATROPURPUREA"—This exceptional novelty met with instant appeal last Spring. Its deep wine red color is entirely new in the creeping Phlox family. Each 25c, per five \$1.00.

SEMPERVIVUM "TRISTE"—A compact, strong grower with especially attractive coloring, being brightly flushed with red in the Spring and Fall. Each 30c, per three 75c.

TROLLIUS LEDEBOURII "GOLDEN QUEEN"—Extra large flowers of bright golden orange. One of the fine hybrids recently introduced. Each 40c, per three \$1.00.

VIOLA "ARKWRIGHT RUBY"—One of the most popular novelties introduced last Spring. Large maroon flowers handsomely marked with black and gold. Each 25c, per 10 \$2.00.

VIOLA "PURPLE GLORY"—A splendid new variety of high merit. A compact grower with large brilliant purple flowers. Stock limited. Each 40c.

WAHLENBERGIA DALMATICA—Pretty clusters of bright blue flowers on short trailing stems. Ideal for the rockery because of its neat habit. Each 25c, per three 60c.

FOUR YEAR OLD AZALEAS

Last Fall, for the first time, we offered plants of Azalea mollis in the three year old size. These stocky, well grown plants were immediately welcomed by our clients. The plants proved highly satisfactory. We are again offering this unusual bargain—AND THE PLANTS HAVE ANOTHER SEASON'S GROWTH ON THEM—at the same price.

Many of these plants will bloom next season. If you wish a fine planting of these flame colored shrubs this is the most economical manner in which to procure it.

each 25c

per ten \$2.00

HUNTINGTON'S

Selected Fall List of Alpine and Perennial Plants

THAT ARE RECOMMENDED FOR FALL PLANTING

WE have compiled a list of alpine and perennial plants that are especially adapted to Fall planting. Many of these varieties are Spring bloomers, and if transplanted early in the Fall will give you immediate results in the Spring.

September is the ideal month in which to transplant, and as a special inducement to order and transplant during the month of September we are offering a 5% discount on all orders of two dollars or more, and a 10% discount on all orders of \$5.00 or more **received before September fifteenth.**

All plants are of the usual high Huntington standard and for this reason we reserve the right to ship via Express. There has been a 25% reduction in Express rates on Nursery stock, and as we have found that plants travel better via Express we will ship by that method when we think it is advisable.

HUNTINGTON'S

Special Collections

FOR FALL

Collections of plants are especially interesting and economical. They are particularly attractive when the group contains new novelties of extra merit. We have selected a group of unusual alpine and border perennials for these collections.

DELUXE COLLECTION OF ALPINE PLANTS

- 2 Aethionema persicum
- 2 Phlox subulata "Blue Hills"
- 2 Viola Arkwright Ruby
- 1 Aquilegia flabellata nana
- 2 Iris pumila Orange Queen
- 3 Oenothera missouriensis
- 2 Saponaria ocymoides splendens
- 2 Saxifraga decipiens grandiflora
- 2 Aster alpinus Goliath
- 1 Euphorbia polychroma
- 1 Dianthus liboschitzianus

DELUXE COLLECTION OF BORDER PLANTS

- 2 Gaillardia Burgundy
- 2 Adenophora lilifolia
- 2 Asclepias tuberosa
- 1 Hemerocallis Mrs. A. H. Austin
- 2 Trollius europeus superba
- 2 Pardonanthus chinensis
- 1 Incarvillea delavayii
- 1 Delphinium belladonna "Cliveden Beauty"
- 2 Hibiscus "Huntington's Grenadier"
- 2 Liatris scarriosa
- 1 Pyrethrum double Shell Pink
- 2 Heuchera sanguinea

each collection \$3.50

When both collections are ordered
the following *Choice Novelties*
Will be Sent FREE

Erinus alpinus

Hemerocallis "Apricot"

Wahlenbergia dalmatica

Trollius "Golden Queen"

[Because of the unusually low price of the above collections and because of the extra size of the plants they are sent via Express only.]

PEONIES

For the last five Fall seasons we have presented unusual collections of fine Peonies. Each successive year we have offered greater value. We feel that this Fall's offer gives more true value than any yet presented.

FIFTEEN
DIFFERENT
PEONIES

\$2.50

These plants are not labeled, but each plant is taken from our fine collection of named varieties. All the better varieties and colors will be used. The extra size of these plants makes it necessary to ship via Express only. Fifteen Peonies \$2.50.

SEEDS

Recommended for Fall Sowing

There is a certain group of perennial seeds that requires late Fall sowing to assure satisfactory results.

This group of seeds needs the action of winter freezing to aid them in germinating in the Spring. When sown in the Spring results are never dependable, but our results with them when sown in the late Fall are always successful.

On page 47 in our general catalogue for 1933 under the heading "How to Get the Best Results With Huntington's Seeds," you will find a list of the varieties that are preferably sown in the Fall. Try them and note the marked results.

On page 30 in our catalogue you will also find an interesting notation on the sowing of choice annual seeds in the Fall. We list a large number of varieties that will give you satisfactory results if sown in the Fall.

As a special inducement to our clients to better acquaint you with the splendid possibilities of Fall sown seeds we are offering a 10% discount on both annual and perennial seeds taken from the list of varieties recommended for late Fall sowing.

FRESH ALPINE AND PERENNIAL SEEDS

For Immediate August Sowing

The following seeds have been recently collected on our Nursery. Excellent results will be obtained by sowing these fine items immediately. Sow in a protected spot, preferably a cold frame, so that the seedlings will not be too exposed during the winter. The young plants should make a strong growth before cold weather sets in, and they will winter successfully. We do not advise a later sowing than August twentieth in this climate.
